

**Automatics & Machinery Co., Inc. (A&M) is the
New Distributor for
Ganesh Machinery in Colorado, New Mexico and Wyoming**

Ganesh Machinery of Chatsworth, CA continues their dramatic growth path with the announcement of Automatic & Machinery Co., Inc. (A&M) **Longmont**, Colorado as a Ganesh Machinery distributor for the states of ***Colorado, New Mexico and Wyoming***. A&M was formed in 1989 and has been a respected force in machine tool distribution across the country. A&M has a staff of 5- experienced sales professionals, **an 18,000 SQ FT WAREHOUSE**, with an enviable track record in serving the needs of customers wishing to acquire more productive machine tools to better compete in today's business environment.

Over the last several years A&M has been searching for the right new machine tool line to offer their customer base. The line needed to span the needs of small to large job shops and production facilities in Colorado and the Rocky Mountain States. It had to include manual tool room machinery through CNC production lathes and mills, from the basic needs through full 5-axis vertical machines. And critically, A&M wanted high quality machine tools at an affordable price. **Ganesh Machinery met and exceeded all of these criteria.**

The new Ganesh Machinery line allows A&M to enter the new machine tool market place offering customers a much broader range of machine tool options and capabilities while A&M's used machine tool expertise gives the customer the added benefit of A&M's ability to be aggressive with a trade-in program.
